President's Letter

(Kari has had a busy summer!)

This time last year my note talked about the kayaking trip I took to the Grand Tetons with my sister. This time my sister and I spent time at our family cabin in Montana with my dad. I've been going there since I was just a few months old. I always said my immune system is pretty good because I grew up drinking, washing dishes and bathing in lake water. Our cabin is right on the lake. We didn't spend any time out on the boat this time. However, we spent most of the days in the mountains on the dirt bikes or side-by-side (like a dun buggy for the mountains). We figured that in the 4 days of riding we road for 18 hours. Every night I'd come home with the darkest tan that washed off in the shower. The last night I spent swimming in the lake. Yep in September. After the cabin we went to glacier national park to kayak and camp in the park. Due to grizzly activity there was no tent camping. Then we made our way up to Canada. We brought the passports. We camped in Waterton Park and were able to kayak Upper and Lower Waterton lake. Then back to glacier for another night of camping. Then off to Missoula Montana where my sister and family live (where I am from). Then back to Colorado the next day. An amazing trip!!! Don't have pics of kayaking, my sister has all those on her camera but here's me at the cabin as soon as we got there. And here's the very first time I was at the cabin on that very same deck 45 years ago.
